25X1X

A compilation of fuel shipments by railroad tank cars between the U.S.S.R. and the Soviet Zone of Germany during the period from 1 March to 6 May 1951 was made. The compilation is based partly on new information from sources of varying degrees of reliability and partly on reports previously submitted. *

25X1A

* Comment. For compilation of fuel shipments, see Annex. The report supplements and continues previous information. See [REDACTED].

25X1A

Most of the shipments mentioned were sent via Frankfurt/Oder, the remainder via Scheune/Stettin (O 54/Q 45), where they were transloaded to ships. Fuel shipments via the Kuestrin-Kietz, Guben, Forst and Horka-Wehrkirch border crossing points were not observed during the reported period. According to available information, railroad tank cars are very seldom sent via these border crossing points. It may be assumed that some tank cars, most of them filled with oil from Zistersdorf for Soviet Zone hydrogenation plants, have passed through Bad Schandau railroad station during the reported period. All shipments in the annex marked with an asterisk have been previously reported.
